Subject: RE: Synthetic turf Install [Scanned]

John:

We appreciate all the hard work and are very pleased with the final product. We have received many compliments from our Board, visitors, parents, students and employees. We have schedule VB intramurals this weekend and have putting and chipping scheduled in two weeks. These two activities would not be possible without Synlawn's assistance. I was impressed with the installation crews and their willingness to answer my questions and address my concerns. Your keeping me up to date in my absence from campus was especially helpful.

I would certainly be willing to visit with any potential customer if they would like to call me regarding turf installation. I have no misgivings about our selection of Synlawn and would certainly recommend your firm in the future.

Thank you again for your efforts and dedication.

David
