**HeatBlock™ Technology:** HeatBlock™ Technology incorporates infrared reflective pigments that help dissipate heat build-up and reduce fiber emissivity by as much as 20% cooler than similar artificial turf products.

**EnviroLoc™ Backing System:** SYNLawn's exclusive EnviroLoc™ Backing System has an enhanced multi-layer component system that "locks" in durable turf fibers, extending the product's life cycle. Engineered using BioCel™ technology, the EnviroLoc Backing System replaces a large portion of petroleum-based polymers with bio-based polymers created from soybean plants (a renewable resource), then adds Celceram™ (a recycled product of coal combustion) for superior strength and dimensional stability.

**Made in the USA:** All SYNLawn products meet EPA, Consumer Product Safety Commission, Prop 65 and all California requirements, tested to ensure they uphold the highest level of standards in the synthetic grass industry.

**\*Manufacturer Warranty:** 15 year warranty is based on installation provided by SYNLawn Certified Installers. Warranties up to 12 years for non-certified installations.
